Route Miles : 39,596

Major Shops : UP : Fort Worth, Tx. ; North Little Rock, Ar. ; North Platte, Ne. ; Salt Lake City, Ut. : C&NW : Chicago, ; Marshalltown, Ia.; Denver (Burnham), Co.

Major Yards : UP : Fort Worth, Tx. ; Houston, Tx. ; Kansas City, Ka. ; North Little Rock, Ar. ; North Platte, Ne. ; Omaha, Ne. ; Pocatello, Id. ; Hinkle, Or. ; Yermo, Ca. C&NW : Chicago (Proviso); SP : Colton, Ca. ; Eugene, Ore. ; Houston, Tx. ; Kansas City (Armourdale), Ks. ; Los Angeles (Taylor), Ca. ; Roseville, Ca. ; Denver (North Yard), Co. ; Salt Lake City (Roper), Ut.

N.B. - Following the takeover of Chicago & North Western a renumbering scheme to assimilate the C&NW units had been commenced. This scheme had allowed for C&NW units to be renumbered in the same number sequences as equivalent UP units and had meant a limited renumbering of some UP units to make room. (Some gaps had been left to take account of the proposed takeover of Southern Pacific) Following the takeover of Southern Pacific an even more elaborate renumbering scheme has been introduced.

The intention is to group locomotives of the same or similar model designation into adjacent blocks of numbers. To do this has meant a further renumbering of some locomotives that had already been renumbered (or were scheduled to be renumbered) which, inevitably, causes much confusion. Where this has happened an indication is given as a footnote to the locomotive group.

In the following list units are ordered in the new number series. Original numbers are also given. Where a number appears in *italics* it indicates that a number has not yet been changed or a previous number respectively.

There are currently some duplications of numbers with small groups of units which are unlikely to be renumbered and are due for early withdrawal. Consequently the following listing is not in strict numerical order.

N.B. The renumbering exercise is being constantly refined - further changes are inevitable!

Model Slug SL-4B

B - B

Built : 1947 - 1950 by EMD. Rebuilt 1979 by GE.

(These units were converted from switchers by the removal of the engine. The traction motors remain and draw current from a conventional unit to which they are attached.)
